9. Time series Planning

2. Interface

1. CPI -DS Interface for time series extraction
2. CPI-DS Extractions from ECC tables
3. Data sources
4. Project, Task, Data flows
5. Production and Quality environment for Data Sources
6. Understanding the extraction of Maser Data

3. Master Data-Demand Planning Supply Planning

1. Product
2. Location
3. BOM
4. Recipe
5. Production Versions
6. UOM and unit of Measure conversion.
7. Currency and Currency Conversions
8. Location Product
9. Location Source

4. Configurations:

1. Attributes
2. Master Data
3. Time Profiles
4. Planning Area
5. Planning Levels
6. Key Figures
7. Planning Operators

5. Demand Planning

1. Demand Planning Process
2. Supply Chain Network
3. Master Data Requirements
4. Transactional Data Requirements
5. Creating First Demand Planning View
6. Key Figures for Demand Planning
7. ABC/XYZ Classification
8. Outlier Correction (Manual/Auto)
9. Statistical Forecasting
10. New Product Introduction
11. Consolidation of Demand Plan through scenarios
12. Copy Operators
13. Release Demand Plan to Supply

6. Supply Planning

1. Supply Planning Process
2. Supply Chain Network
3. Master Data Requirements
4. Transactional Data Requirements
5. Check Mode and S&OP Heuristics set up
6. Generating unconstrained supply run
7. Creating Supply Planning Views
8. Working with EPM Formatting

-
9. Generating Customer Quota through Forecast
 10. How to work with Adjusted KFs?
 11. Local Members

7. Charts and Dashboards

1. Create first Analytics chart
2. Adding charts to Dashboards
3. Using charts and dashboards filters to navigate
4. Custom Alerts

8. Response and SDI interface

1. Touchbase

9. Inventory Optimization

1. Touchbase
