## About Multisoft

Train yourself with the best and develop valuable in-demand skills with Multisoft Systems. A leading certification training provider, Multisoft collaborates with top technologies to bring world-class one-on-one and certification trainings. With the goal to empower professionals and business across the globe, we offer more than 1500 training courses, which are delivered by Multisoft's global subject matter experts. We offer tailored corporate training; project Based Training, comprehensive learning solution with lifetime e-learning access, after training support and globally recognized training certificates.

## About Course

The SECCL2 Secure Cloud Integration with SAP Business Technology Platform (BTP) Training by Multisoft Systems is designed for professionals seeking to strengthen their expertise in secure cloud integration between SAP and non-SAP systems. This course provides an in-depth understanding of SAP BTP architecture, connectivity options, and security mechanisms essential for managing modern hybrid cloud environments.

## Module 1: SAP Business Technology Platform Overview

- ✓ Introduction to SAP BTP
- ✓ Core components and services of the platform
- ✓ Intelligent enterprise concepts and integration capabilities

## Module 2: SAP BTP Security Concepts

- ✓ Understanding SAP BTP security fundamentals
- ✓ User and platform roles, identities, and trust models
- ✓ SAP BTP cockpit and account management basics

## Module 3: Hybrid Connectivity with SAP Cloud Connector

- ✓ Configuring secure connections between cloud and on-premise systems
- ✓ Principal propagation and secure tunnel concepts
- ✓ Cloud Connector architecture and security settings

## Module 4: Authentication Options in SAP Identity Authentication Service

- ✓ Authentication mechanisms (for example OAuth, SAML)
- ✓ Identity provider scenarios and configuration
- ✓ Using external user stores with IAS

## Module 5: Identity Provisioning for On-Premise & Cloud Applications

- ✓ Setting up identity provisioning scenarios
- ✓ Syncing user accounts between on-premise directories and BTP
- ✓ Provisioning lifecycle and logging
